## Seed Catalogue 2023

*"Britain's Number One Tobacco Seed Merchant"*

### **AFRICAN RED**

African Red is a bright leaf variety with light green colored leaves and white stemmed. A vigorous grower reaching 8 feet in height at the first crows foot. Plant form is columnar. Average size of 10th leaf at maturity 28 inches. Leaf width 12" 28 leaves total on un-topped plants, not including bed leaves. Matures in 80 days. Has a high nicotine content. Original seed is from Transvaal, South Africa.

### **ARGENTINEAN SYLVESTRIS**

A vigorous plant growing up to 5 ft. with large 20" leaves and sweet scented long drooping white flowers. It's not strictly a smoking variety. Its unusual flavor makes it a good candidate for blending cigarette tobacco. A very attractive and fragrant plant that should be planted in every flower garden, whether you choose to smoke a bit of it or not.

### **AZTEC RUSTICA**

Aztec Rustica is native to Central and South America. It grows to 30 inches high with abundant bright yellow flowers that are very attractive to bees and humming birds. Flowering lasts up to two months. Grows well in cool climates and tolerates frost.

Very high in nicotine and also used for making insecticide

### **BANANA LEAF**

This is a bright leaf heirloom variety that grows to 6 feet or more in height. It produces a narrow pointed leaf to 30" long and 12" wide. It gives good yields and matures in only 50-55 days.

### **BIG GEM**

Big Gem is an heirloom bright leaf variety which grows to 5 1/2 feet in height. It produces leaves 30" long by 18" wide and matures in only 55-60 days. A tried and true variety that is a good producer.

### **BLACK MAMMOTH SMALL STOCK**

A deep dark tobacco that gives good weight and supports itself very well. This is a tobacco prized by growers because it provides a great wrapper tobacco or a premium snuff tobacco when ripe. A good tobacco for beginners learning to roll their own cigars or make snuff.

### **BLUE TREE GLAUCIA**

A graceful tobacco which can grow very tall, thus the name tree. They can grow up to 20 ft. Their flowers are bright yellow and are very striking against the blue foliage. Also makes a lovely garden specimen. Strictly not a smoking variety, but useful for reducing nicotine levels in any blend.

It is said to have very small quantities of nicotine. A wonderful tobacco which like Turkish is very useful for blending cigarette and pipe tobacco.

### **BURLEY ORIGINAL**

The original and popular commercial strain of burley tobacco makes a great addition to any garden.

It is used for its hardiness and smooth, rich flavor. Good for cigarette making. This variety grows fast and is a high yielding plant.

### **BURLEY VARIATION**

A variation of the popular common Burley, this variety is a large plant. A fine commercial strain that is used for its hardiness and smooth flavor. A fine tobacco plant for the beginner. Air-cures easy.

### **CATTERTON**

A heirloom Maryland type tobacco. A very good producer with sharp pointed leaves growing to over 30 inches long and 16 inches wide. Air cures easily to a rich reddish brown color. Matures in 60-65 days. This variety is one of our personal favorites.

### **CHERRY RED**

Bright leaf variety growing to 7 feet in height. One of the heaviest producing bright leafs we have grown. Averaging 26 leaves to crows foot, not including bed leaves. Leaves grow to 24 inches in length and 15 wide. Moderate suckering. Matures in about 75 days after transplant. Leaves air cure to a light yellow / gold color.

### **CONNECTICUT BROAD LEAF**

Connecticut Broad-leaf is a fast maturing cigar wrapper tobacco. It grows to 4 feet in height with dark green leaves to 30" long and 16" wide. It matures in only 45-50 days.

### **COSTELLO**

Costello is a bright leaf variety imported by the USDA from Columbia in 1967. It grows to a height of 5-6 feet with closely spaced leaves. Plant form is an inverted cone. Matures in 60-65 days. Ripens evenly and is easy to cure whether primed or hung whole. Has a high nicotine content at 24mg/g of dried leaf. Mild flavored.

### **CUBAN CRIOLLO 98**

Another very popular Cuban cigar variety. Will grow up to 6-7 ft. tall. It's leaves are longer, more slender and slightly darker than the Habano 2000. It's cured leaves have a silky texture making it a good covering for cigars.

It has a pleasant, mild aroma and taste.

# The Tobacco Seed Company

## Seed Catalogue 2023

*"Britain's Number One Tobacco Seed Merchant"*

### **CUBAN HABANO 2000**

One of the most popular varieties for cigar enthusiasts.

This Cuban variety grows to about 5-6 feet tall and has wide, rounded leaves. When cured the leaves have a reddish to light brown color. It makes a great filler for cigars.

Has a pleasant, mild aroma and taste.

### **CUBAN HAVANA 142**

Havana 142 is classified as a cigar binder but is often used in making chew. Many growers find it makes an excellent cigarette tobacco as well. A columnar plant which grows to a height of 4 feet, it matures in only 55 days. A good choice for areas with short growing seasons. Air cures to a light brown.

### **DEL GOLD**

Developed in Canada by crossing wild Rustica tobacco with two popular American varieties. The result is a high-yielding, high-nicotine cultivar. It grows to 5 feet and produces large, wide, heavy grade light green leaves. Del Gold is one of the best known varieties for commercial tobacco production. Matures in 70-75 days.

### **DIXIE BRIGHT**

Dixie Bright 27 was developed in the 1960's and produces a light colored leaf with good yield and weight. It grows to 6-7 feet in height. Matures in 65 days. As the name suggests, the leaves air cure to a light yellow brown.

### **GOLD DOLLAR**

Gold Dollar is a heirloom bright leaf that grow to 4 1/2 feet in height with leaves over 2 feet long. An early maturing variety that ripens in 50-55 days. Air cures to a light brown.

### **GOLDEN BURLEY**

Golden Burley is a medium flavored Burley with excellent curability. The leaves grow to over 30" long by 12" wide, and turn a bright lemon yellow when ripe. Plants grow to 4 1/2 feet in height with little to no suckering. Matures in 60-65 days after transplant. Air cures to a light buck skin brown color. Requires less aging time than most Burleys.

### **GOOSE CREEK RED**

Goose Creek Red is named after a small river that runs into the Charleston Harbor. This dark Virginian type tobacco is air cures to a deep reddish brown color and makes an excellent pipe or full flavored cigarette blend. It has a silky feel, making it ideal as a wrapper for cigars. Grows to about 6 feet in height and matures in 65 days.

### **GREEN BRIOR**

Green Brior is a full flavored heavy producing Burley that is a long time favorite of growers. It reaches a height of 6

feet, with light green leaves 24" long by 14" wide. Low suckering and matures in approximately 70 days.

### **HARROW VELVET**

Harrow Velvet is a medium flavored Burley with excellent curability and a short aging time. Columnar plant form with tightly spaced leaves which are very uniform in size. Almost no suckering. Leaves average 24" in length by 14" wide and turn a golden yellow as they ripen. Mature in 65-70 days. Leaf cures to a medium brown. This plant carries what I think is a great name for a tobacco, don't you think?

### **HICKORY PRYOR**

Hickory Pryor is an heirloom Virginia type tobacco. It produces very large leaves and heavy over all yields that rival modern day hybrids. It matures in 65-70 days. The leaves air cure to a medium golden brown. It's mild smoke and flavor make it an excellent choice for cigarette or pipe blends.

### **ISLETA PUEBLO**

Isleta Pueblo is a Rustica variety originating in New Mexico. It is a very fast grower and matures in under 40 days. Grows to 5 feet. It tolerates cool weather very well and can be planted earlier than many other nicotianas.

The leaves are dark green and have a thick rubbery texture. Air cures to a medium brown.

Isleta Pueblo is high in nicotine content and should not be smoked alone. Used also for making insecticide.

### **KENTUCKY 15**

KY15, as it's more commonly known, is a white stemmed high yielding Kentucky Burley. It has good resistance to most tobacco diseases. It is a columnar formed plant with large closely spaced leaves. Our grows have produced no suckers. Leaves turn yellow as it ripens, curling down around the edges. Maturity is 60-65 days. It has excellent curability and leaves dry an orange brown.

### **LITTLE DUTCH**

Little Dutch is an heirloom variety dating back to the 1880's. It is sweet aromatic tobacco used in pipe blends and as a cigar filler. It grow to around 3' in height and has narrow leaves growing up to 30" long. The long narrow leaves also make an excellent cigar wrapper. It matures in only 45 days and is a good choice for container growing. Used for cigars and pipes.

### **LIZARD TAIL ORINOCO**

A tall, thick textured tobacco with leaves that produces a rich brown tobacco.

Another favorite of pipe smokers but also makes a good blending tobacco for cigars and cigarettes.

# The Tobacco Seed Company

## Seed Catalogue 2023

*"Britain's Number One Tobacco Seed Merchant"*

### **MADOLE**

Madole is an heirloom dark tobacco with a rich full flavor. It's often fire cured for use as a pipe or cigar tobacco. Its deep colored green leaves air cure to a dark brown. It grows 5 feet in height and matures early in 55-60 days.

One of the more popular dark tobacco varieties grown.

### **MARYLAND**

A medium flavored Maryland type tobacco that grows to 6 feet in height and produces very large leaves to 36" long and 18" wide. It air cures to a light reddish brown color. Maryland tobacco is commonly used as a blender. Matures in 55-60 days.

### **MOHAWK RUSTICA**

Mohawk Rustica is native to Central America as was widely cultivated by Native Americans and grown throughout the southern US. It grows to 3' in height and is similar to Aztec, but with less branching.

The leaves are thick, dark green in color and are among the largest of any Rustica variety. The flowers are a bright yellow and are densely packed.

Mohawk, like other rustica varieties is very high in nicotine and is also used for making insecticide.

### **MONTE CALME YELLOW**

A favorite European variety that features wide, thin leaves that are much preferred for cigarettes and as cigar wrappers. Grows up to about 6 ft. tall, producing a large crop.

Believed to be of Cuban decent, this tobacco produces a taste not dissimilar to Gitanes.

### **ORINOCO**

Classified as a primitive variety, this is the original Orinoco imported from Java, Indonesia in 1927. It grows to 6 feet in height and matures in 60 days after transplant. The leaves are long and narrow growing to over 24" by 10" wide and produce a flavorful smoke. It has a very high nicotine content of any tobacco, so use with caution and use for blending only. It makes a good blend to mix with low nicotine tobaccos like Virginia Gold or Turkish.

### **OXFORD 207**

Oxford 207 is a bright leaf variety that was developed in North Carolina. It has good resistance to bacterial wilts and blank shank disease. It grows to 5 feet and is a very good producer of high quality leaf. Matures in 60 days. Air cures to a golden yellow color.

### **PARIS WRAPPER**

Paris Wrapper is an heirloom bright leaf variety that is a vigorous early season grower reaching a height of 6 feet. Its leaves grow to 30" long and 20" wide. The leaves are a

very light green with white stems. Matures in 60 days and air cures to a light golden brown.

### **PELLETED TURKISH BASMA**

The variety has small sized leaves being broader of their upper half. Their texture is moderately thick, elastic and soft. Their leaf color is light yellow to yellow and light red. It is mild, sweet and aromatic tobacco, that is familiar to any smoker. Essential for adding fragrance to any blend. Nicotine content is supposed to be very low.

### **PELLETED BURLEY TENNESSEE**

One of the more popular commercial strains of Burley tobacco originating in Tennessee and still carrying its name.

It is used for its hardiness and smooth, rich flavor. Good for cigarette blending as well as for making milder cigars. This variety grows fast and is a high yielding plant and air cures very easily.

### **PELLETED VIRGINIA GOLD # 2**

This wonderful F1 hybrid variety is said to be the most popular flue-cured tobacco grown in the USA in 2010.

These pelleted seeds make life for the grower much easier, as they can be planted straight into individual pots and have very high germination rates.

This plant grows fast and is also high yielding plant. Leaves turn a bright yellow/orange as they cure.

### **PENNSYLVANIA RED**

Pennsylvania Red is a rich full flavored tobacco and a long time favorite of cigar makers as a filler or binder. It grows to 5 feet in height and has very large long deep colored leaves reaching 3' in length. A very good producer that matures in 65-70 days. The leaves cure to a deep reddish brown.

### **RUSSIAN RED**

This is an unclassified tobacco. It grows to around 3 feet in height and has very dark green leaves. It produces a fair amount of tobacco, but its most striking feature is its large magenta red flowers which contrast against the deep green leaves. A good dual purpose plant.

### **SHERAZI**

Sherazi is a Turkish variety grown in Iran. The leaves tend to be small but abundant. It is prized for its flavor and aroma, and is usually sun cured, it matures in about 60 days.

### **SILK LEAF**

Silk Leaf is an old heirloom Virginian variety which has regained popularity among growers in recent years. It grows to 6 feet in height and is a good producer of leaves averaging 20" inches long by 12" wide.. Matures in 65-70

# The Tobacco Seed Company

## Seed Catalogue 2023

*"Britain's Number One Tobacco Seed Merchant"*

days. Used mainly as a cigarette tobacco for its mild flavor, or as a pipe blend.

### **SOUTHERN BEAUTY**

Southern Beauty is an heirloom bright leaf which is quick and vigorous grower to over 6 feet. Leaves are light in color and grow to 30" long and 16" wide. Matures in 55 days and gives very good yields. Air cures to a golden yellow.

### **STAG HORN**

Stag Horn is a hardy dark Virginian that grows fast, with long, thick, narrow leaves. The leaves turn under at the tips giving it a horn like shape. It has a rich, full flavor and is good for cigarettes, pipes and cigars. Stag Horn grows up to 6 feet in height and matures in about 65 days. The leaves air cure to a deep reddish brown.

### **TURKISH BAFRA**

Turkish tobacco often used in pipe tobacco blends and cigarettes. Columnar plant growing to 5 feet. Mature in 50 days. Cures a medium brown. Has a very low nicotine content.

### **TURKISH BASMA**

This is one of our newer varieties. One of the best Turkish tobacco seeds you can buy. These seeds are particularly apt at growing in dry conditions or just about anywhere.

They are short in height and the leaves are smaller than usual.

Their taste is mild, sweet and aromatic. They are used especially to give fragrance and sweetness to blended tobaccos. Nicotine content is said to be about 1%

### **TURKISH IZMIR**

This is one of our NEW varieties of 2010. This Turkish tobacco is renowned for its unique flavor. It grows quite tall ranging from 5-7 feet and produces 20 to 30 leaves, each 15-16 inches long and c8 inches wide. The taste of this variety is distinguished by its unmistakable aroma and mildness.

### **TURKISH SAMSUN**

Black Sea Samsun originated in the Samsun region of Turkey on the Black Sea. Prized for rich flavor and aroma, but yet mild to smoke. It matures in 65-70 days and is often sun cured. An excellent tobacco for blending or smoking on its own

### **VIRGINIAN GOLD # 1**

The finest and one of our most popular strains of cigarette and pipe tobacco.

This variety is known to most cigarette smokers and is a fine and elegant plant. A must for cigarette making.

This plant grows fast and is high yielding plant. Leaves turn a bright yellow/red as they mature.

Mild tasting with very large, broad leaves.

### **VIRGINIAN GOLD # 2**

This wonderful F1 hybrid variety is said to be the most popular flue-cured tobacco grown in the USA in 2010.

This plant grows fast and is also high yielding plant. Leaves turn a bright yellow/orange as they cure.

### **VIRGINIAN GOLD # 3**

Another fine bright flue-cured tobacco variety, which is said to mature earlier than other virginian types. Useful for those areas where there is a short growing season or where the grower is short on patience.

Very large and broad leaves offering a mild but satisfying smoke

### **WHITE MAMMOTH**

White Mammoth is a bright leaf tobacco that grows quick and matures very early at only 50-55 days. It grows 4/12 feet with leaves 2' long and 1' wide. Suckering is low and the leaves cure easily. A good choice for short growing seasons.

### **WISCONSIN 901**

Wisconsin 901 is classified as a cigar binder though may also be used as a filler or as a pipe tobacco blend. It produces large leaves, has a tight upright columnar form and matures in 55-60 days.

### **YELLOW PRYOR**

Yellow Pryor a heirloom bright leaf variety used in both cigarette and pipe blends. It grows to over 4 feet in height with little suckering. It is a very good producer maturing in only 50-55 days. Leaves air cure to a light brown.

### **YELLOW TWIST BUD**

This is a white stemmed heirloom Burley that grows 5-6 feet in height. It produces few suckers and its pyramidal plant form with closely spaced leaves give it good wind resistance. The leaves are up to 30 inches long, turn a light yellow when ripe and are easy to cure. Matures in 60-65 days.

## **Seed Catalogue 2023**

*"Britain's Number One Tobacco Seed Merchant"*

### **IMPORTANT – PLEASE READ**

We supply tobacco seeds to adults who want to grow and produce their own tobacco as an alternative to buying from shops.

We don't encourage or support the large scale production of tobacco for commercial gain.

We do not sell any tobacco products.

We don't like to give false hopes. Smoking tobacco, even home grown tobacco, is as harmful to your health as any other store bought tobacco. You know this, or at least you should do, if you're considering growing your own tobacco to smoke.

We ask you be careful when selecting your seed varieties, as many of heirloom varieties (esp, Rusticas) are very potent in tar and nicotine.

We do not accept responsibility for any claims arising from the purchase of our seeds whatsoever, beyond the replacement of seeds which fail to germinate or which are not safely delivered.
